### Profile

I am a Senior UX Designer with an industrial design background and some love for front-end web development. I have been creating experiences that simplify users' lives since 2006..

I am comfortable working in Agile development environments, managing multiple tasks and setting goals for a project. I am an advocate of design as a problem solving discipline and I use empathy as a primary skill.

### Experience

---

#### Senior UX Designer at Goldstar Events, Inc.

MAY 2015 - PRESENT

As a UX Designer at Goldstar I work on different projects for customers, ticket suppliers and company employees. I collaborate with cross functional teams using often a complete design process (user research, whiteboarding, sketching, wireframes, user flows, prototypes, final comps).

- Design of tools for ticket suppliers so they can manage and promote their inventory in our system.
- Design of administration tools for online events.
- Design of mobile first solutions for final customers, including a new seating chart UI for checkout.
- Creation of add-ons for partners like Eventbrite.
- User research: conduct interviews to customers, suppliers and employees, organize remote and in-person usability testings, creation of personas.

#### UI Designer at Lightspeed Systems

JULY 2012 - MARCH 2015

- Design of cross-platform solutions for My Big Campus, a K-12 learning management system, including Android, iOS, Windows 8 and Web apps.
- Implementation of semantic markup and concise and scalable CSS for different products.
- Creation of a live style guide used across several web products and followed by the rest of the developers in the company.
- Design of Classroom Orchestrator, a product used by teachers in order to monitor students' computers in real time.

---

## **UI Designer at HP AgriSystems**

NOVEMBER 2011 - JULY 2012

Creation of visual identity, design of interfaces and front-end development for horsepower.com, an ag-oriented e-commerce website.

## **Web Designer at Micrographic Web Design**

JANUARY 2008 - AUGUST 2011

This was my little digital shop in Valencia, Spain. We created corporate websites for hospitals, wineries and other midsize companies and we collaborated with several local organizations.

## **Web Designer at Katana Red**

NOVEMBER 2006 - JANUARY 2008

Design of interfaces and front-end development at a digital agency, with special attention to in-house projects (online communities and e-commerce sites).

---

## **Academic Education**

---

**Universitat Jaume I (Castelló, Spain)** / Degree in Technical Engineering in Industrial Design  
2001 - 2005

---

## **Non-Academic Education**

---

### **UX Certificate - Interaction Design Specialty**

NIELSEN NORMAN GROUP - UXC# 1041982, DECEMBER 2020

### **Interaction Design Training**

COOPER U - PORTLAND, OREGON, NOVEMBER 2014

### **Interaction Design: Beyond the Wireframe**

FUTURE INSIGHTS LIVE - LAS VEGAS, NEVADA, APRIL 2013

---
