Profile

I am an *Interaction Designer* with an industrial design background and some love for front-end web development. I have been creating experiences that simplify users' lives for more than nine years.

I am comfortable working in Agile development environments , managing multiple tasks and setting goals for a project. I benefit from discovering new approaches and constantly learning from my colleagues.

Experience

UI Designer, Lightspeed Systems; Portland, OR — 2012-2015

Design of cross-platform solutions for My Big Campus, a K-12 learning management system, including Android, iOS, Windows 8 and Web apps.

Implementation of semantic markup and concise and scalable CSS for different products.

Creation of a live style guide used across several web products and followed by the rest of the developers in the company.

Architected Classroom Orchestrator, a product used by teachers in order to monitor students' computers in real time.

UI Designer, HP Agrisystems; San Luis Obispo, CA — 2011-2012

Creation of visual identity, design of interfaces and front-end development for horsepower.com, an ag-oriented e-commerce website.

Web Designer, Micrographic; Valencia, Spain — 2008-2011

Design and implementation of corporate websites for hospitals, wineries and other midsize companies.

Web Designer, Katana Red; Valencia, Spain — 2006-2008

Design of interfaces and front-end development at a digital agency, with special attention to in-house projects (online communities and e-commerce sites).
